AERO LECTERN | The LECTERN features table details including angular sub-top, pedestal and accent base.

AERO CART | The Serving Cart provides a convenient serving surface with portable storage.

◀ **Integrated Handle**
he Serving Carts includes an integral handle built in the top end overhangs.

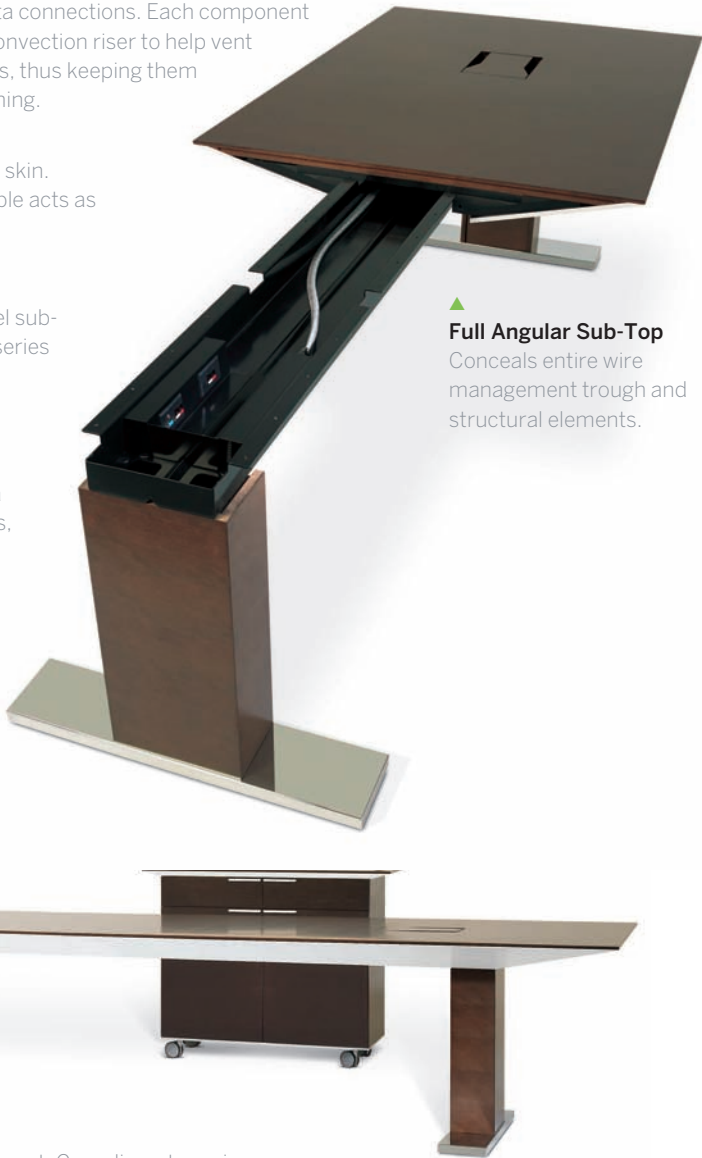

Ease of Access ▲
Aero allows for unobstructed power and data installation. Installers and electrician's are now able to work within the bases and trough without having to crawl underneath or on top of the table. Thus, increasing the speed and ease of installation, while reducing the potential for damaging the finished product. Access panels and trough are easily wired after installation as well.

Media Walls/Units ▲
The Aero Series features a number of multimedia display and storage solutions. They are all free standing, thus, eliminating the need for wood backer board, damage to finished walls, and misalignment of power and data connections. Each component uses a vertical convection riser to help vent media appliances, thus keeping them cool and functioning.

Monocoque Construction
This construction technique supports the structural load by using the external skin. Aero's strength comes from its unitized shell construction. Thus, the entire table acts as a unit, distributing the load across of its members. ▶

Mixed Material Construction
Aero possesses the strength of steel and the beauty of wood. The use of a steel sub-frame amplifies the strength of the wood components within Aero to give the series exceptional rigidity. ▶

Component Construction
Aero is broken up into components to help streamline the installation process. The bases and trough are mechanically fastened for a quick set up for the wiring of power and data. The table top is self aligning, thus, reducing possibilities of human error during the installation process. ▶

▲ **Full Angular Sub-Top**
Conceals entire wire management trough and structural elements.

Line Collection ▲
The Aero Series has all the elements needed for the conference room environment. Complimentary pieces, create a seamless visual aesthetic and optimize function with a breadth of media, hospitality, and storage solutions for any conference environment.
